BioLogic

Purpose-built instruments for **analytical electrochemistry**

HIGH ACCURACY LEVELS, WHATEVER THE CURRENT

- 80+ techniques:
  CV, DPV, SWV, RDE, EIS, chronoamperometery/potentiometry etc.
- High-end accuracy:
  Accuracy down to 100 fA, resolution down to 80 aA, analogic ramps
- Comprehensive research solutions:
  Wide range of potentiostats, boosters, scanning workstations, RDE/RRDE, QCM, furnaces, sample holders & many more accessories
